

A majority of programs that responded to a 2024 Afterschool Alliance survey reported providing NPSS student supports. Mentoring is provided by nearly half of these programs.

# Supporting Students Beyond the School Day

## Results from the Afterschool Alliance Provider Survey on High-Impact Student Supports

To better understand the landscape of high-impact student supports nationwide, the National Partnership for Student Success (NPSS) Support Hub at the Johns Hopkins Everyone Graduates Center (EGC) collaborated with the Afterschool Alliance to survey a convenience sample of out-of-school time (OST) providers about the extent to which they offer specific high-impact student supports in their programs, as part of a larger tracking survey fielded by the Afterschool Alliance. [Read the full report here.](#)

62% of OST providers who responded to the survey reported offering student supports through at least one of the roles that the NPSS focuses on (high-intensity tutoring, mentoring, student success coaching, college and career advising or postsecondary transition coaching, and wrap around services that connect students and families to community resources). Nearly half of providers that responded to the survey offer mentoring and about a third offer wrap around services. Two in ten offer college and career advising or postsecondary transition coaching, student success coaching, and/or high intensity tutoring. The survey results indicate significant growth in the number of adults providing these supports in out-of-school time programs during the 2023-24 school year when compared to the previous (2022-23) school year. They also indicate significant demand for these types of evidence-based student supports during out-of-school time among those that offer them.

# SURVEY FINDINGS: SUPPORT SERVICES

The survey results indicate that government funding may have played a key role in providers' abilities to provide NPSS supports, as providers with COVID relief funding, 21st Century Community Learning Center funding, AmeriCorps funding, and state government funds were more likely to report offering NPSS supports than those that did not have this funding.

**62%**

62% of programs surveyed by Afterschool Alliance provide one or more of any student support service.

Mentoring services are being provided by nearly one half of all surveyed programs, while wrap around services are provided by nearly one third.

# SURVEY FINDINGS: MENTORS

The providers who responded to the survey were most likely to report providing mentoring of all of the NPSS supports, with 47% of providers offering this people-powered support.

**Change in Number of Students Receiving Mentoring**

(Among programs offering mentoring: n=521)

**Change in Number of Adults Providing or Coordinating Mentoring**

(Among programs offering mentoring: n=521)

**5** is the median number of staff in support of mentoring.

*(Among programs offering mentoring, not sure excluded: n= 455)*

**47%** of programs offer mentoring.

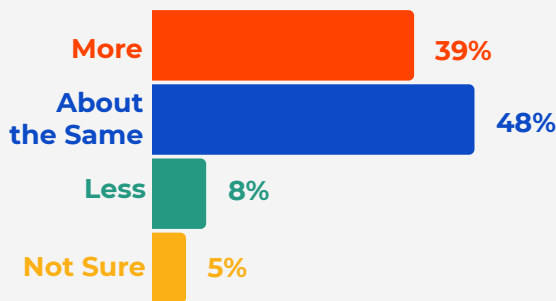

**6.5** is the mean number of added adults in support of mentoring.

*(Among programs with 'more' adults providing or coordinating for support service: n=146)*

# SURVEY FINDINGS: WRAP AROUND SUPPORTS

30% of the providers responding to the survey reported providing wrap around services that connect students and families to community resources.

**Change in Number of Students Receiving Wrap Around Services**

(Among programs offering wrap around services: n=330)

**Change in Number of Adults Providing or Coordinating Wrap Around Services**

(Among programs offering wrap around services: n=330)

**3** is the median number of staff in support of wrap around services.

*(Among programs offering wrap around services, not sure excluded: n= 295)*

**30%** of programs offer wrap around services.

**2.9** is the mean number of added adults in support of wrap around services.

*(Among programs with 'more' adults providing or coordinating for support service: n=96)*

# SURVEY FINDINGS: COLLEGE & CAREER COACHES

Two in 10 providers responding to the survey reported offering college and career advising or postsecondary transition coaching. This increases to 31% among providers serving middle school and 53% among providers serving high school.

**Change in Number of Students Receiving College & Career Coaches**

(Among programs offering college and career coaching: n=233)

**Change in Number of Adults Providing or Coordinating College & Career Coaching**

(Among programs offering college and career coaching: n=233)

**3** is the median number of staff in support of college and career coaches.

*(Among programs offering college and career coaching, not sure excluded: n= 204)*

**21%** of programs offer college and career coaches. This increases to **31%** among providers serving middle school and **53% among providers serving high school.**

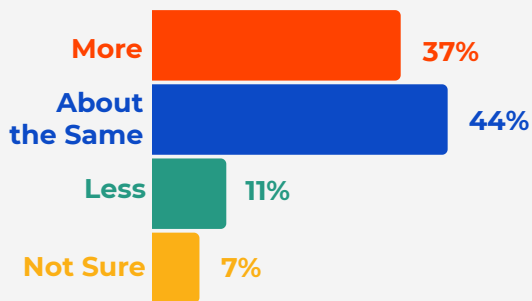

**3.5** is the mean number of added adults in support of college and career coaches.

*(Among programs with 'more' adults providing or coordinating for support service: n=66)*

# SURVEY FINDINGS: STUDENT SUCCESS COACHES

While a smaller percentage of providers (20%) reported offering student success coaching compared to other NPSS supports, the number of staff supporting this work in organizations implementing it is significantly higher than the other NPSS supports at an average of 24 staff members per organization.

**Change in Number of Students Receiving Student Success Coaching**

(Among programs offering student success coaching: n=218)

**Change in Number of Adults Providing or Coordinating Student Success Coaching**

(Among programs offering student success coaching: n=218)

**5** is the median number of staff in support of student success coaching.

*(Among programs offering student success coaching, not sure excluded: n= 185)*

**20%** of programs offer student success coaching.

**4.4** is the mean number of added adults in support of student success coaching.

*(Among programs with 'more' adults providing or coordinating for support service: n=74)*

# SURVEY FINDINGS: HIGH-INTENSITY TUTORS

19% of providers responding to the survey reported offering high intensity tutoring in their programs.

**Change in Number of Students Receiving High-Intensity Tutoring**

(Among programs offering high intensity tutoring: n=217)

**Change in Number of Adults Providing or Coordinating High-Intensity Tutoring**

(Among programs offering high intensity tutoring: n=217)

**5** is the median number of staff in support of high-intensity tutoring.

*(Among programs offering high-intensity tutoring, not sure excluded: n= 199)*

**19%** of programs offer high-intensity tutoring.

**6.6** is the mean number of added adults in support of high-intensity tutoring.

*(Among programs with 'more' adults providing or coordinating for support service: n=65)*
